Tyre Care & Highway Safety Checklist

Complete Tyre Health, Tread Depth & Pressure Guide

Section 1: Reading Your Tyre Sidewall

Understanding size markings (e.g. 185/65 R15), load index, speed rating, and manufacturing DOT date code.

Section 2: The Coin Tread Depth Test

Using a one-rupee coin to check remaining tread. Replace tyres when tread wears below 2.0 mm.

Section 3: High-Speed Highway Safety

Why low tyre pressure causes sidewall flexing and blowouts at 100+ km/h. Essential pre-highway checks.
